

# ANCESTRAL QUEST™ 16

## The Natural Upgrade for PAF 5

Personal Ancestral File® (PAF) 5 is essentially a slightly modified older version of Ancestral Quest (AQ). In 1999, Incline Software licensed a copy of Ancestral Quest 3.0 to the LDS Church, and with a few modifications, PAF 4 was introduced as the first Windows version of PAF. Since that time, PAF 4 evolved into PAF 5, and Ancestral Quest has also evolved. AQ 16 has virtually all the features of PAF 5, but has so much more. A user of PAF 5 will feel right at home with AQ 16, as most screens are very similar if not identical. The basic flow of entering families, individuals, notes, sources, and printing reports as well as handling maintenance tasks (such as working with GEDCOM files and filters) are all about the same.

**Database Conversion.** You won't even have to convert your file. AQ 16 can use the same .paf data file that is used by your PAF 5 program. You can continue to use PAF 5 along with AQ 16 if you so desire.

**Features.** Below is a partial list of the new and improved features you will be able to enjoy with AQ 16. But remember, the basic features of AQ 16 are about the same as the basic features of PAF 5, so you'll feel right at home while enjoying all of these new improvements.

**FamilySearch™ Family Tree.** Ancestral Quest is a FamilySearch Compatible Solution and has features to allow you to synchronize your AQ or PAF database directly with the FamilySearch Family Tree database and **directly reserve temple ordinances for individuals in your file.** AQ's Memories Manager allows you to transfer images and memories between FS FT and AQ. If you prefer to continue to use PAF 5 rather than upgrade to AQ 16, **AQ 16 is a FamilySearch compatible**

**PAF add-in.** Use AQ 16 alongside PAF to synchronize your PAF database with FamilySearch Family Tree.

### Usability Enhancements

- To Do Lists/ Research Manager and Log**
- Share Custom Events and Share Scrapbook Items**
- Database Compare and Merge**
- Name List View **sorts on Any Field**, and up to 3 fields
- Research **Timeline** and **Descendants** Views
- NetFam Collaboration** – work on a master database as a team
- Spell Check** Notes
- Categorize Sources**
- Documentation Center** – see all your notes and sources at a glance.
- Individual view** shows everything about an individual in one place
- Find **women by married name**
- Search for **Source by Author**
- Re-order sources** for any event.
- Confidential Relationships**

### Internet Research Enhancements

- TreeTips** Hinting for **FamilySearch** and **FindMyPast**
- Advanced Searches on **Ancestry.com**, **MyHeritage**, and more

### Reporting Enhancements

- Background Images** on many Charts
- Publish a Family Book**
- Print any report to **PDF** files
- Research Log**
- Research Timeline Report**
- Fan Charts**
- Dropline** Descendants chart
- Print **Images** of Sources on Reports
- Print **Siblings** of ancestors on Ancestor type charts
- Direct Line of Descent **Drop Line Chart**

### Additional Features if you Convert Your Data to .aq:

- Merge **duplicate citations** to eliminate duplicate footnotes
- Attach citations to just a **date or a place**
- Properly record **step-child** situations
- Color Coding and User Defined Tags
- Keep a **detailed log** of changes
- Global find/replace** of names, dates and places
- Link** to Scrapbook items stored on Internet
